

DABI ATLANTE **19 litre**

- **PRACTICALLY AND DURABILITY:**

100% in stainless steel (19LX) or carbon steel (19LX Blanche), it offers long durability and resistance against constant temperature variation.

- Optimizes the use of the office power, sterilizing a greater number of instruments at once.

- **SAFETY AND DURABILITY:**

Door closing system with high functionality and great pressure resistance, within international standards, with probes that delay the beginning of the cycle until the door is completely locked.

- **HIGH PERFORMANCE SILICONE DOOR-SEALING SYSTEM:**

Resists temperature and pressure variations with excellent elasticity, avoiding leaks.

- **AUTOMATIC SAFETY VALVE:**

Avoids overpressure, and thus damages to the equipment.

- **PRE-PROGRAMMED STERILIZATION WITH STANDARD CYCLE:**

Makes the process simple and reliable to be executed by the dentist or assistant.

- **OPEN DOOR DRY CYCLE:**

Model : 19L

Sterilization pressure : 1,3/1,7/2,1/2,3 kgf/cm²
+0,2 kgf/cm²

Operation temperature : 121C/127C/131C/134C

Sterilization time: 6 min./15min./30min.

Power feed : 220v-50/60hz-8A-1750W
110/127V-16A-1750W

Depth : 620mm

Width : 480mm

Height : 390mm

Weight : 41,5kg

- High performance silicone door-sealing system resistant to temperature and pressure variations with excellent flexibility, avoiding leaks.

- **PRACTICALITY:**

Control commands and device totally electronic resulting in a simple operation and precision in time and temperature controls.
