

DABI ATLANTE Cyclone

Ideal solution for use in various offices

High suction power (500mm Hg) for up to 4 offices, a flow rate of 200 liters / minute system.

Patient comfort, efficiency for professional

Movements eliminates the spittoon, Improving productivity and saving time.

Strength and durability

Motor with stainless steel shaft and flange, rotor and cap in bronze high oxidation resistance and long service life.

An ally in biosafety

The mist is formed by the high rotation contaminated area, Which contains residues of the tooth, old restorations, microorganisms of the mouth, saliva, caries and periodontal pockets up. The high suction power of Cyclone Considerably angiograms this fog, contributing to infection control and improved visualization of the surgical field.

Supply Voltage :

220Vac

240Vac 60Hz $\pm 10\% \pm 10\%$ 50Hz

Engine power :1HP

Water consumption :0:25 / min

Water pressure :14psi ± 2

Vacuum levels 500mm/Hg

Displacement / Airflow : 200L/min

Weight :35kg

Height :378mm

Length : 375mm

Width :245mm

Energy consumption : 1650VA $\pm 10\%$
